

securtrak

The Anti-Theft Tracking Device

Vehicle tracking systems have become increasingly popular in private vehicles as a theft prevention and retrieval device.

securtrak from Celtrak is a very effective Pay-as-you-go Vehicle Tracking system that allows Vehicles to be monitored 24/7.

Using the latest GPRS technology, **securtrak** enables you to track the location of your vehicle using the internet or your mobile phone.

Key Benefits

Protect your vehicle 24/7

Our web based solution is fitted to your vehicle and communicates with Celtrak servers over a mobile phone network, providing real time vehicle tracking data.

Quickly locate a missing vehicle

In the event that your vehicle is stolen you can quickly ping it by sending a text message or via our website and your vehicle will respond with its location.

Keep insurance costs down

Many insurers offer significant discounts for fleet policies where vehicle tracking solutions are installed.

Top up from website

securtrak is available on a pay-as-you-go basis. A small annual service fee is charged for accessing the system and each additional ping is charged only as you use them.

securtrak

The Anti-Theft Tracking Device

Features
